

NAME: _____

DATE: 05/05/15

ASSIGNMENT: Building a Website from Scratch

DIRECTIONS:

- 1.) Go to w3schools.com
- 2.) Click “Learn HTML”
- 3.) Click “Try it Yourself.” A new tab will open.
- 4.) This is your editor on the left and HTML canvas on the right. Do not close this window!
- 5.) Go back to the original tab and click “Go to HTML Examples!”
- 6.) Under HTML Basic, insert a link to your favorite college and an image of its mascot.
- 7.) Under HTML Headings, add a horizontal rule to stratify your custom heading from the rest of your website.
- 8.) Under HTML CSS, change the background color of your website with “HTML with internal CSS.”
- 9.) Under HTML Links, link your favorite college’s website to the image of its mascot from earlier.
- 10.) Under HTML Tables, insert a table with your top 3 favorite colleges, the city where they are located, and the cost of tuition per semester.
- 11.) Under HTML Lists and add a “nested list I” with the top reasons to attend your favorite college.
- 12.) Under HTML Layout, use semantic elements to improve the view of your website.
- 13.) Under HTML Input Types, insert a radio button for a question you ask the viewers of your website about your favorite college.
- 14.) Under HTML Input Attributes, add a placeholder attribute to ask your viewers to submit their contact information.
- 15.) Under HTML5 Media, insert “Play Bunny” into your website but change the link to a commercial from YouTube about your favorite college.
- 16.) Finally, under HTML5 Geolocation, insert a geolocation with a map so you can pinpoint the location of your website’s viewers.
- 17.) The rest of your website is up to you. Have fun!
